25X1		

On 24 May 1954, source counted 16 x 85-mm AA guns, 24 x 37-mm AA guns, and 48 motor vehicles in the area of Camp Apetlon (P 48/X 74). He believed, however, that the total was 60 motor vehicles. Much activity was observed between the quarters and the parking lots for weapons and motor vehicles. Tents were probably also pitched. Vehicles leaving the camp included weapon carrier  and trucks  25X1

All vehicles were driven by soldiers with red-bordered black epaulets. Local residents stated that the bulk of the troops arrived at the end of the third week of May although intensive firing practice had been observed before. 25X1

Comment. Most of the vehicle  belong to the Central Group of Forces, components of the 23d AAA Div from Korneuburg and Stockerau, and the air force AAA battalion from Kagen.  The information confirms the previous assumption that the 23d AAA Div moved to Apetlon for firing practice. 25X1
